Publications

Top-tier venues in computer science and human-computer interaction research appear at ACM conferences such as CHI, CSCW, and UIST. They are highly selective venues and intended for archival papers only. These conferences often exceed journals in their selectivity, visibility, and impact. Submissions undergo multiple rounds of review before being accepted for publication. CHI and CSCW are ranked by Google Scholar as the top 2 venues under the Engineering & Computer Science, Human Computer Interaction category for their impact. In 2018, CSCW transitioned to a hybrid

journal structure and renamed itself Proceedings of the ACM on Human-Computer Interaction. CSCW (PACMHCI: CSCW). * indicates equal contribution.
