## Publications

Top-tier venues in computer science and human-computer interaction research appear at ACM conferences such as CHI (h5-median: 174) and CSCW (h5-median: 113). They are highly selective venues and intended for archival papers only. These conferences often exceed journals in their selectivity, visibility, and impact. Submissions undergo multiple rounds of review before being

accepted for publication. In 2018, CSCW transitioned to a hybrid journal structure and renamed itself Proceedings of the ACM on Human-Computer Interaction. CSCW (PACMHCI: CSCW).
